TA513-1

Brandon Cullum  
Chief Financial Officer  
Alaska Electric Light and Power Company  
5601 Tonsgard Court  
Juneau, AK 99801

Dear Mr. Cullum:

Pursuant to Order No. U-22-078(7) enclosed are validated copies of Tariff Sheet Nos. 126 and 146, filed November 15, 2022, by Alaska Electric Light and Power Company with TA513-1.

The rates on the tariff sheets are approved on an interim and refundable basis, effective January 1, 2023. Please note that "Pursuant to U-22-078(7)" has been added to the bottom left corner of each tariff sheet.

Sincerely,

REGULATORY COMMISSION OF ALASKA

**RECEIVED****NOV 15 2022**STATE OF ALASKA  
REGULATORY COMMISSION OF ALASKA**Alaska Electric Light and Power Company****Regulatory Commission  
of Alaska**Schedule No. 25 (Continued)  
Large Commercial - Interruptible Electric Heat

## Rate (Continued):

7. In the event the price of fuel oil exceeds \$1.50 per gallon, the price of interruptible energy will be computed as follows:  
Cents/KWH =  $3.18 \times \text{\$/gallon of No. 2 Fuel Oil}$
8. In the event the customer must utilize interruptible energy when it is considered not to be available it will be provided at the penalty rate.
9. The rate charged will be 10.88 cents per KWH for billings rendered on and after January 1, 2023. T

## Penalty Rate:

The penalty rate will be equal to 1.5 times the Schedule 10 Peak Season KWH energy charge plus Cost of Power Adjustment.

Penalty rates will be in effect when the Company's equipment has operated to provide a switching signal to switch off the customer's controlled service loads during winter peak seasons, hydro shortages or emergencies.

If the customer location chooses not to be interrupted they will forfeit the service locations ability to participate from that time forward, unless a true emergency occurs and the customer needs their electric heat. During this period the customer will pay the penalty rate until repairs are completed.

## Control Criteria:

Electrical loads are subject to interruption as deemed necessary by the Company. Typical conditions could include peak loading, hydro shortages or other emergencies.

## Equipment Supplied:

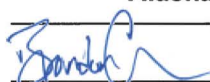

AELP will supply the necessary metering and control equipment. Wiring by the customer shall be such that the meter and associated controlling devices are separate and located adjacent to each other.
